Fall 2005 Admissions Exceptions Report

Executive Summary

The University of Missouri's admissions policy makes provision for the admittance of students who do not meet the regular admissions criteria. The *Fall 2005 Admissions Exceptions Report* is a series of tables summarizing the trends in the University's exceptions policy in four key areas: 1) the percentage of students not meeting the regular criteria; 2) the nature of deficiencies for students not meeting the standard admissions criteria; 3) the success and retention rates of students meeting the standard admissions criteria compared to students admitted under the exceptions policy; and 4) the six-year graduation rates of students meeting the standard admissions criteria compared to students admitted under the exceptions policy. Table 1 shows the change in the number and type of admission exceptions to current University of Missouri admissions policy from Fall 2001 to Fall 2005. Table 2 shows the exceptions to the less rigorous admissions standards of the Missouri Coordinating Board of Higher Education. Table 3 shows the success and retention rates of Fall 2004 freshmen enrolled at the University and compares these figures based on current University of Missouri and CBHE policies. Table 4 shows the relationship of standard admissions criteria to performance of freshmen from Fall 2000 to Fall 2004. Table 5 indicates the relationship of standard admissions criteria to six-year graduation rates of freshmen from Fall 1996 to Fall 1998.

The highlights of this report include:

- Seventy-four percent (74%) of all first-time, degree-seeking, full-time freshmen enrolled at the University of Missouri during the Fall 2005 met the standard University of Missouri admissions criteria. The majority of students not meeting the standard criteria were deficient in the high school core course requirement (Table 1).
- Eighty-seven percent (87%) of all Fall 2004 freshmen enrolled at the University of Missouri achieved a minimum grade point average of 2.0 during the academic year. Students that met the standard admissions criteria had a higher success rate than students admitted as exceptions (Table 3).
- The overall retention rate from Fall 2004 to Fall 2005 at the University of Missouri was eighty-three percent (83%). Students meeting the standard admissions criteria were more likely to return than students admitted as exceptions (Table 3).
- The overall freshmen success and retention rates remained steady from Fall 2000 to Fall 2004 (Table 4).
- Six year graduation rates for students admitted as exceptions have remained steady at forty-four to forty-five percent (44%-45%) from the Fall 1996 to the Fall 1999 freshmen cohorts. Students meeting the standard admissions criteria were more likely to graduate than students admitted as exceptions (Table 5).

Admissions Policy

Effective Fall 1997, the criteria for regular, full-time admission of recent high school graduates require completion of 17 units of high school credit and a combination of percentile rank in graduating class and ACT (or SAT) test score consistent with the Coordinating Board for Higher Education's selective category. The 17 units required by the University of Missouri include 4 English, 1 fine arts, 2 foreign language, 4 mathematics, 3 science, and 3 social studies. The University's policy is more rigorous than the Coordinating Board for Higher Education's standards in that the University requires two foreign language units, one additional unit of mathematics, and one additional unit of science. The University and the Coordinating Board share common requirements for test score and class rank. Both require an ACT or SAT equivalent of at least 24 or a combination of ACT percentile rank and percentile rank in graduating class of at least 120.

The policies of both the University and the Coordinating Board make provision for admitting students who do not meet standard criteria. Specifically, both allow an exception rate of 10%. The University's exception rate applies to both test score and rank or core course requirements. The Coordinating Board's exception policy applies only to test score and rank. The Coordinating Board expects all regularly admitted students to meet core requirements. Both policies apply to full-time, first-time, degree seeking students. It should also be noted that the required combined percentile total of 120 is a minimum requirement.

Caveats

University policies apply to admitted students but campus performance is measured in this report according to the characteristics of enrolling students. Not all admitted students enroll and admissions professionals might be well within policy targets for admitted students but appear to miss the target when actual enrollments are tallied.

The decision to admit or deny admission to an applicant is made with partial information, usually months before the student's graduation from high school. It is not unusual for students to report a planned academic program that meets requirements and then fail to follow that plan. The University does not know of the change in behavior until it receives a final transcript and might not receive a final transcript until after the student has enrolled.

The criteria used to define the populations for this report may differ slightly from those used to compile compliance reports or reports used by individual campuses for other purposes. Therefore the retention, success, and graduation rates may differ slightly from those in reports produced elsewhere.

Technical Notes

The term exception is used to identify students not meeting each and every component of the required combination of ACT test score and high school rank and core course distribution for regular admission. Many students classified as exceptions were admitted because they presented strong credentials in most respects or offered other measures predicting likely success.

A successful student is defined as a student that was enrolled as a first-time, degree-seeking, full-time freshman during Fall 2004 and either: 1) was enrolled only in the fall and had a minimum grade point average (GPA) of 2.0 on a 4.0 scale at the end of the fall semester; or 2) was also enrolled in the spring (full-time or part-time) and had a minimum cumulative GPA of 2.0 at the end of the academic year.

Please note that all students that were successful were not necessarily retained for the fall semester. At the same time, all students that were retained for the fall semester were not necessarily successful during the previous academic year. For example, a student with a GPA greater than 2.0 may not have returned for the fall semester. On the other hand, a student that had a GPA below 2.0 may have returned for the fall semester.

Restrictions include:
 Restricted to first-time freshmen (EMSAS STUSTAT = '1'),
 who are degree-seeking (EMSAS DSSTATUS='1'),
 who are attending full-time (FTEE GE 0.80),
 who are recent high school graduates (EMSAS HSGRDYR = '2005'),
 who are not nonresident aliens (EMSAS RACE = '60'),
 or GED students (EMSAS HSCODE = '960000'),
 or home schooled (EMSAS HSCODE = '969999').

Does include students from other states and those without a test score or class rank.

Elective*												

The Fall 1996 cohort entered under CBHE Admissions requirements. The six year graduation rates for Fall 1996 cohort reflect that policy.

High School Core Course Requirements	UM
English	4
Fine Arts	1
Foreign Language	2
Math	4
Science	3
Social Sciences	3
Electives	0
Sum	17

Restrictions include:

First-time freshmen (EMSAS STUSTAT = 1)
 who are degree-seeking (EMSAS DSSTATUS = 1)
 who are attending full-time (EMSAS FTEE GE .80)
 who are recent high school graduates (i.e., EMSAS HSGRDYR = 1996, 1997, 1998, 1999)
 who are not nonresident aliens (EMSAS RACE = 60)
 or GED students (EMSAS HSCODE = 960000)
 or home schooled (EMSAS HSCODE = 969999)
 Does include students from other states and those without a test score or class rank.
